

WE ARE PLEASED TO INTRODUCE YOU TO

Time Matters® 2021

This new version of Time Matters delivers seamless integrations with LawConnect and LawToolBox to meet the ever-changing needs of our clients. Time Matters AMP Membership Customers can upgrade to the latest version of the software at no additional charge.

LawConnect:

Sending files to clients has never been easier or more secure. LawConnect is an online resource that enables you to send encrypted documents and PDFs to your clients.

You and your clients can work remotely, receive, sign, and comment on documents online. Send confidential documents to as many as 10 recipients at once from the Documents Manager of the Time Matters dashboard.

LawToolBox:

With our new LawToolBox integration, you can enjoy the latest enhancements in advanced docketing. LawToolBox clients can instantly generate court deadlines in Time Matters as well as automated rule changes, custom reporting, court rule customization, email reminders, audit trails, and customizable deadline templates.

Designed to help ensure deadlines are never missed, LawToolBox grants users the ability to track case dates, including orders, appearances, deadlines driven by cases, rules and case management orders. Updated deadlines and appearances in LawToolBox automatically sync docketing reports, custom reports, email reminders and calendars for users assigned to a case.

Other Performance Enhancements:

Beyond these new integrations, Time Matters 2021 features several key performance enhancements and bug fixes. Performance enhancements include updated support for Adobe Acrobat Pro 2020, Intuit Quickbooks 2021, LexisNexis Juris 3.1 and Microsoft SQL Server Express 2017.

We have also added a new rolling workweek view calendar option.

To access these integrations with LawConnect and LawToolBox as well as key performance enhancements, AMP Membership Customers must upgrade to Time Matters 2021.
