ZenCase

Next Generation Law Practice Software
with
Knowledge Management & Workflow Automation

At ZenCase, our roots are in the practice of law and we are focused on solving the problems that law firms face.
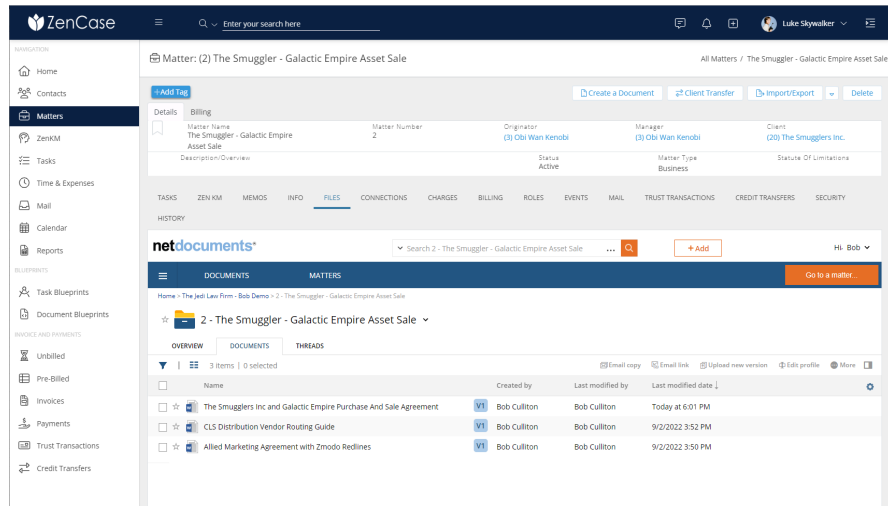

For Managing Partners

You need easy access to information to guide the firm, wanting to increase productivity and profitability, balance resources, create a proactive culture or retain firm knowledge as you manage remote workers and staff turnover. ZenCase has a better way through its customizable dashboards, report library and Knowledge Management functions.

For Legal Administrators

We know you do the real work and you'd like to reduce the time it takes to manage pre-bills, billing and collections. You'd want easier accounting and report access. You would like to reduce the time involved in Trust Accounting and LEDES billing. You'd also like to make the attorneys more self-sufficient! ZenCase has a better way.

For Attorneys

You are dealing with information overload. You'd like to increase your billable hours and be more productive so you can take on additional clients. ZenCase makes it easy to capture all of your billable time though our new Automated Time Manager™ technology. We make matter/case management easier and give you the tools to quickly assign tasks and track deadlines. Leverage prior work with our document & task automation functions and knowledge management… All with just a few clicks.
